JACK BERMAN
PRIMARY EXAMINER

Art Unit: 2881

The current examiner disagrees with the propriety of the election requirement made by the previous examiner in the Office action mailed on August 23, 2005, so that requirement is hereby withdrawn.

The following is an examiner's statement of reasons for allowance: While it is known in the art to provide a current detector on the wafer stage in an electron beam exposure apparatus, there is no suggestion in the prior art to store the output of the current detector in a storage unit also located on the wafer stage for later review rather than transmit the output to an external storage or processing means. The omission of such a transmission signal while the electron beam is irradiating the wafer avoids a possible source of interference with the control of the electron beam.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack I. Berman whose telephone number is (571) 272-2468. The examiner can normally be reached on M-F (8:30-6:00) with every second Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John R. Lee can be reached on (571) 272-2477. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
